Uday Lal

Software Developer

When I first wrote "Hello world" on the console I just fell in love ♥ with this world of software engineering. I am very committed to learning and improving my skills, Since then I get progressively better. There are some projects that show up my skills.

Experience

2022 - 2023

Glam Studios | Noida

Full Stack Developer

- Develop and maintain company's glamstudios.in
- Work on the company's admin, salon management and salon manager portal called **Glamos**
- Add new features to company's website and salon management portal
- The tech stack that I've been working on were: Laravel, Javascript, JQuery, HTML, CSS

2021 - 2022

Bonami Software | New Delhi

Software Developer

- Work on PHP, javascript, and python related projects
- Work on the backend of the given project.
- The projects that I've worked on were -> Company's hiring portal, Smart Auction, leadschool
